

PLEASE JOIN US TO CELEBRATE

National Engineers Week 2008

E-Week Kickoff Luncheon

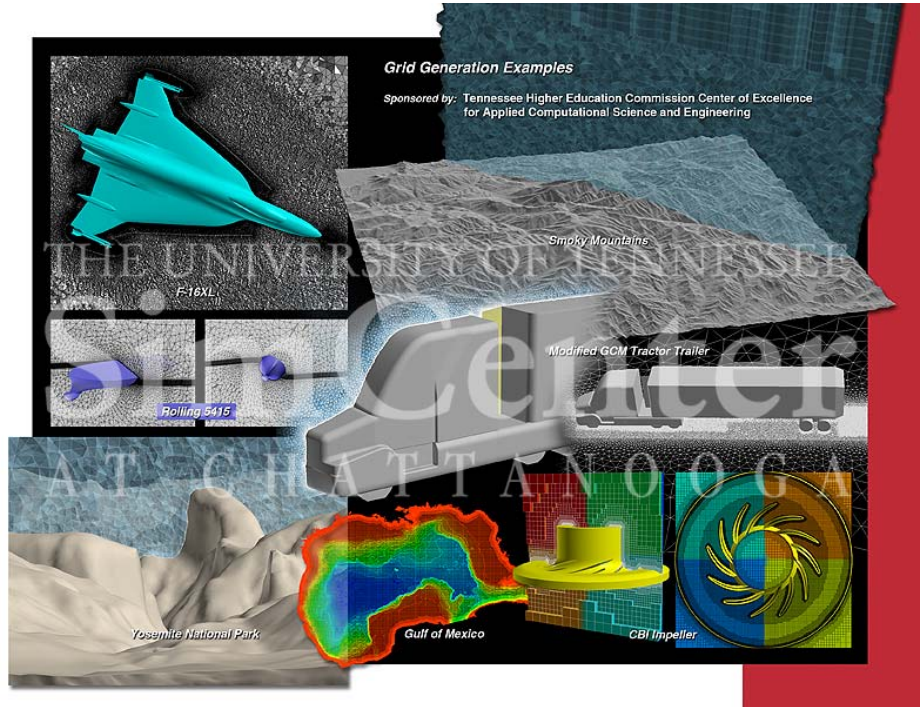

“ Next Generation Engineering--The National Center”

Monday, February 18th, Noon

**Benwood Auditorium
University of Tennessee
733 Vine Street
Chattanooga, TN**

**Cost: single ticket \$15,
corporate group of eight \$110**

**RSVP requested by Feb. 10,
call Kelley Evatt at
423-209-6813**

A Fireside Chat with:

Dr. Dave Whitfield and Mr. Mike Pearson
Moderated by Mr. James Frierson

In November 2007, UTC SimCenter became The SimCenter: National Center for Computational Engineering. This provides a major focal point for technological advancement and economic development in the region and strengthens Chattanooga's position in the Tennessee Valley Corridor. These recent developments offer a new era of opportunity for businesses and industries regionally and nationally. Recently, Huntsville-based Radiance Technologies announced the opening of a project office here with an initial staff of eight engineers. A key element drawing them to Chattanooga is the availability of the SimCenter: National Center. Radiance provides capabilities to design, develop, fabricate, integrate and test both components and systems. One such example is the "Weapon Watch" system being used in Iraq—a one shot technology.

Dr. Dave Whitfield, Director of the Center, and Mr. Mike Pearson of Radiance Technologies will chat about the full implications of economic development, technological growth, and availability of technology resources in Chattanooga and the surrounding region.

Offered by the Chattanooga Engineers Club, Local Engineering Societies and the Chattanooga Technology Council. Reservations for this and other EWeek events may also be made using the form on www.ChattanoogaEngineersClub.org
